## 第四章

例 4.4  $X=+13,\ Y=-13,\ 分别采用 6 位原码、补码、反码的移位规则,求 <math>X/2$ 、2X、Y/2、2Y 的值。

[X]原 <b>=</b> 0,01101	[X/2]原	X/2 = +6	[2X]原	2X = +26
	=0, 00110		=0, 11010	
[X]*=0, 01101	$[X/2]_{\nmid h}$	X/2 = +6	$[2X]_{\creak{k}}$	2X = +26
	=0, 00110		=0, 11010	
[X] <sub>反</sub> =0,01101	[X/2] <sub>反</sub>	X/2 = +6	[2X] <sub>反</sub>	2X = +26
	=0, 00110		=0, 11010	
[37] 1 01101				
[Y] <sub>原</sub> =1,01101	[Y/2] <sub>原</sub>	Y/2 = -6	[2Y]原	2Y = -26
[Y] <sub>©</sub> =1, 01101	[Y/2] <sub>原</sub> =1,00110	Y/2=-6	[2Y] <sub>原</sub> =1,11010	2Y=-26
[Y] <sub>新</sub> =1,01101 [Y] <sub>补</sub> =1,10011	2 3	Y/2=-6 Y/2=-7	2 3	2Y=-26 2Y=-26
	=1, 00110		=1, 11010	-
	=1, $00110$ [Y/2]*		=1, 11010 [2Y]**	-
